-When a passenger boards or leaves a horse-car in Germany the conductor touches his hat and says "Good-day." And if the passenger gives him a "tip" of one cent he looks happy for the rest of the trip.

-A Hindoo lecturer in England says that the British have degraded India and her people to the level of beasts, and that tens of thousands die yearly of starvation, and all reports are suppressed.

-Pricking with a bunch of fresh nettles as a cure for anæsthesia, neuralgia and numerous other diseases, has long been practiced by the Russian peasantry, and a native doctor speaks highly of its efficacy.

-The population of Norway exhibeyes than any other country in Europe. Flaxen hair occurs in 57.5 per cent. while absolutely black hair is only found in the ratio of 2 per cent.

-Both the Russians and the British, as they push farther and farther into Asia, pay great attentiou to arboriflowers wherever they form a settleis being reforested.

-The remarkable "Floating Island" of Derwentwater, England, the perigreat blister-like upheaval of peat presence of the King, and it is to be which here forms the bottom of the presumed the author had the Kingslake.

-In Sweden, during some hundred penned his little satire. years, military training has been introduced in all public schools as part of the daily curriculum. When twenty years old every Swede must serve as sworn, pledging their honor instead of soldier for a short period during two their oath, and it is still, according to years in succession.

-The annual report of the Indian Department of Canada says there are encouraging indications that the Indian element will eventually become amalgamated with the general population of the country. The Indian population of the Dominion is 124,589.

-A Japan paper states that since the United States prohibited Chinese immigration there has been a very perceptible increase in the number of Chinese immigrants to Japan. Recently the case. There are many sinecure stances where the otter does not sink of them are now employed in tea-firing are always, or nearly always, given to Owing to its exclusively marine habits

-According to the Oakland Echoes one can scarcely be half an hour in Honolulu, keeping one's eyes and ears tolerably wide open, without arriving at full knowledge of the fact that the Hawaiian kingdom is commercially and socially "bossed" by the United er's shame; others, the Marl-States of America, and by the State of

California in particular. -It is said that the Emperor of China is anxious to encourage the building of railroads in his kingdom, but he is surrounded by many obstacles. His priests, astrologers, and advisers of various kinds are afraid of Western civilization, and they employ all manner of devices to keep the young potentate from acting in a progressive way. The astrologers never find the stars favorable to the granting of a railroad franchise.

-A farm-laborer in China is hired by the year, at from \$8 to \$14, with food, clothing, head-shaving and tobacco. From 8 to 10 cents per day, and the noon-day meal, for ordinary day's work; but 10 to 20 cents per diem, with five meals, or 30 cents per day without food, for planting and harvesting rice. Food averages little more than \$1 a month for each member of a farmer's family.

-Pigeon-flying is growing to be an absorbing amusement in England, particularly among the Birmingham laborers. The spread of the sport has developed quite a new branch of railway traffic. It is the practice of flyers to send their birds in baskets, addressed to the station-master at a particular station, with the request that he release them, mark on a label the time that they were released, and return the basket. This request is regularly granted. The officials rather like the work. In cloudy weather porters have been known to feed birds or three days before setting them free.

# PRIVILEGES OF PEERS.

Modern Noblemen Have More Privileges

in Theory Than in Reality. Theoretically a peer has many privileges; practically he has very few. The word peer must be understood to include Dukes, Marquises, Earls, Viscounts and Barons; though it is generally understood to include all persons entitled to the prefix of Duke or Lord. In common parlance, these are the two prefixes of English nobility. The title of the present Prime Minister is the Marquis of Salisbury, but nine times out of ten he is referred to loved prophet in the seven-storied as Lord Salsbury. That nobleman's paradise of Islm. Last year (1888) old rival, the Earl of Derby, is generally spoken of as Lord Derby, and when all the pilgrims have to unite for every man who speaks of Viscount in worship at Mecca, took place Wolseley there are at least a score on Friday, August 17. It usualwho apply to the hero of Tel el- ly occurs about this time, but Keber the shorter and more popular the exact date varies, and is fixed anprefix "Lord." Lord Tennyson is fre- nually by the religious authorities quently spoken of, but the poet laureate is really a Baron and his correct title, to be punctiliously accurate is Alfred, Baron Tennyson. In other words, al- perform it several times, and some most every peer with lower prestige make a business of it and hire themthan a Duke is familiarly spoken of selves out as substitutes for others, for as "Lord," a striking evidence of the a pilgrimage by proxy is considered to growing carelessness of the public as | be as effective as one performed in perto titles; and it is needless to add that son, provided that the person in whose peers themselves are much too jealous of their privileges and titles to be one can hire a substitute during his body can grow any thing that he can found to be firm enough for all pur-

ly valued was the right of a peer of the realm to demand a trial by a jury of his peers if charged with treason or felony. Such trials, however, are of very rare occurrence and the privilege and Washington, but chiefly in the viamounts to very little. It is largely cinity of and to the north of Gray's responsible for the ancient saying about there being one law for the rich and another for the poor, especially as in times gone by a peer had to be wealthy, and was even dispossessed of his title if his fortune fell below what had to be adopted. was considered the nobleman's mini-

Among the other privileges of the

individual is treedom from arrest in person from attachment. To-day this civil suits is a very rare occurrence. But it was different in the old imprisonment-for-debt days, when the privilege was often extremely convenient. It is quite commonly supposed that a peer can not be arrested its a higher percentage (97.25) of light by the police for a criminal offense, but this is an error, and of late years several noblemen have been "run in" for misdemeanors. Exemption from jury service is often a more valuable privilege, and a peer has also the right to sit in any court of justice with his hat on, a right, culture, planting trees, shrubs and it is needless to add, that few noblemen are caddish or idiotic enough to ment. The result is that Central Asia take advantage of. The Barons of Kingsdale possess, in addition, the right in perpetuity of sitting in the presence of royalty with their heads odical appearance of which has given covered. In an American novel there rise to so much speculation, has been is an amusing reference to a nobleman to reach the beach for the same pedeclared to be the highest part of a who was granted the right to sit in the riod.

There are few other privileges possessed by peers. They may, under certain circumstances, decline to be offense to criticize or malign a peer. But the old scandalum magnatum, described by Blackstone, is partially a dead letter, and it is now good form for a peer to treat his traducers with silent contempt. American visitors often express astonishment at the barrenness of the honor of peerage, and possibly some readers may imagine that a nobleman is in receipt of some kind of remuneration. Such is not the dead animals, and in occasional in- surface water rapidly and at the same 486 arrived at Yekohama, and "most offices connected with politics which granting of a peerage does not involve | last sea otter shall have been killed. a royal or national grant. Some peers | but it must always be a very rare aniowe their titles to the immorality of certain female ancestors, and still draw pensions in part payment for their great - great - grandmothboroughs for example, draw pen-

sions as a result of a nation's gratitude to a successful General. But, speaking generally, a peerage is a source of expense and not of revenue. No man will accept peerage unless he is comparatively wealthy. Hence, a peer is often a peer because he or his ancestors were blessed with plenty of this world's goods, but it is to confuse cause and effect to imagine that a peerage involves wealth. It is often just the other way .- St. Louis Globe-Dem-

PILGRIMAGE TO MECCA. It Is Incumbent on All Good Moslems to

Perform It Ouce At Least. Every year thousands upon thousands of pious believers in the name of Mohammed desert their homesteads and wend their way, both by land and by sea, toward the country that saw the birth of their religion and witnessed the miraculous deeds of their arch-prophet. From China, India and Persia; from every quarter of the Turkish Empire; from Egypt, Tripoli, Tunis, Algiers and Morocco; from Zanzibar and Senegal; from Kurdistan and Afghanistan; from the Soudan and the great Sahara, and from many other places whose existence we Europeans are but dimly conscious of, they throng-mostly poor, ignorant and dirty, but devout and determined in their purpose. They are pilgrims to the holy cities of Arabia, Mecca and Medina, and to reach them they starve themselves for years to save up sufficient money to defray their expenses and endure horrible privations by the way. They commit themselves to the mercies of the vast and awe-inspiring sea, dreaded by all true Easterns. They risk being robbed by the Bedouins or killed by the heatand all with an amount of phlegm and good humor that is almost sublime. Whatever happens to them they care not. God will provide for them, and should they die on their way out they will be received all the more readily into the mansions and the arms of the voluptuous houris already provided for each one of them by their much-bethe Great Hadi, or principal day,

at Mecca. It is incumbent on all good Moslems to perform this pilgrimage at least once, if they can afford it. Many behalf it is performed be dead. FISHING WITH A RIFLE

Exciting Sport Shooting the Wary Sea Otter in the Pacific Surf shooting is practiced in Oregon Harbor. Formerly all the shooting was done from the beach, or from the bluffs, but as the otter became scarcer, increasingly wary, and so more difficult to obtain, other methods

The sea otter shooters of this coast devised the plan of building scaffolds in the water out beyond the surf from which to shoot. At the lowest tides civil actions and the exemption of the in the spring they plant firmly in the sand three or four long poles so that does not amount to much, as arrest in they shall form the angles of a triangle or of a square. These are braced by means of slats nailed from one to the other, which also form a ladder by which to ascend, and at the top of the poles a platform is built with sides and a roof, forming a sufficiently-comfortable house, forty feet above the water's surface. These shooting scaffolds, or as they are called locally, "derricks," give the otter shooter great advantage. In distance he gains four to five hunired feet, while the elevation above the water greatly extends both his range of view and that of his rifle. In fair weather the shooter goes to his "derrick" before daylight in the morning and returns at night to the shore. but sometimes, when the tide is high and a heavy surf is rolling, it may be impossible for him to get to it for a week at a time, or he may be unable

The skill attained by these men in rifle shooting is something almost bedale privilege in his mind when he wond belief. It will be readily understood that the head of the sea otterthe only part that is seen above the water-is a very sma'l mark, certainly not more than three or four inches in diameter, and yet it is said these shooters not unfrequently kill at a God.-Hamilton. the statute books, a most serious distance of one thousand yards. Most of their shots are made at two hundred yards and over. They use heavy Sharp's rifles, fitted with telescopic

sights, and shoot always from a rest. When the sea otter is killed it sinks a week before it rises to the surface and is brought by wind and current into shore. The hunters employ Indians to patrol the beach and secure dogs are employed to bring it to land. mal.-Forest and Stream.

#### LOVE LEVELS RANKS.

Romantic Story of an Englishman and a A story comes to the clubs from Newport about a wealthy but not overbeautiful girl who has been receiving marked attentions from a very handsome young Englishman of excelent family to such a degree that her friends have taken it for granted that the two were soon to start together down the lane of roses and thorns, hearts. One day these lovers rode together out to the estate of a gentleman farmer who was a friend of the young

wait for her to come up and then ask great oaks and chestnuts and pines?

#### HOME AND FARM.

-If new settings of either plum or eachtrees are to be made arrange to plant them in a vard where the poultry can be allowed a free range.

-Apple Pickles: To one pint of vinegar add three cups of brown sugar, one teaspoonful each of cinnamon and cloves, and cut the apples in halves. core and boil in the sirup till soft. -Stewed Cucumbers: Pare, cut

them in quarters, and remove the seeds; then let them boil in salted water until tender. Drain them, roll each piece quickly in hot ham fat, and serve on buttered toast.

-For good, reliable work on the farm the mule is better than the horse, but if there is any intention to sell for good prices a grade draft horse is much the better. - Western Plowman.

-Keep up the cultivation with the cultivated crops until they are made. In many cases one additional cultivation given in good season will materially increase the yield, while it will aid in destroying the late weeds and leave the soil in a better condition for the next crop.

-Salad of Asparagus Tops: One pint of asparagus tops. The rule for French dressing. Boil the tops in salted boiling water for fifteen minutes, drain, throw into cold water, and let stand until ready to use. Then dry carefully with a soft napkin, put them into the salad dish, pour over the French dressing; let stand about ten minutes, and serve. - Table Talk.

-Six things are requisite to make a home. Integrity must be the architect and tidiness the upholsterer. It must be warmed by affection and lighted with cheerfulness, and industry must be the ventilator, renewing the atmosphere, and bringing in fresh salubrity day by day; while over all, as protecting glory and canopy, nothing will suffice except the blessing of

-The plowing is an important item and should be done thorough as well as early. If manure is to be applied it should as a rule be given after plowing, as the work of preparing the ground for the seed will incorpoat once, and it may be several days or rafe it well with the soil and it will thus be in a condition to be used by the growing plants. The surface of the soil must be made fine and level with sufficient drainage to take off the time avoid washing.

-It was once no trouble to raise fruit of all kinds free from knots and godowns at the rate of remuneration peers, but the salary often fails to and its great wariness, we may assume other defects, but it seems this is no which none but Chinese would accept." come up to the expenses. Even the that it will be many years before the longer the case. Insects are in the orchard, and unless they are destroyed fruit is not a profitable crop. The tent caterpillar, so troublesome of late years, was never known to do serious harm thirty or forty years ago. Now complaints of this pest come in from all sections as regular as the seasons roll round, and orchards have to be gone over every spring and the caterpillar destroyed.

### USE OF MANURES.

A Vigorous Protest Against the Unnatural Prof. I. P. Roberts, of the Cornell Experiment Station, in a recent adwith clasped hands and trusting dress employed the following pertinent illustration anent the use of manures: "We should not go home and throw our manure out of the window to be woman's family. As they were gal- washed away by the rains. Some haul loping along the road toward the it direct from the stable to the field at house they saw a girl coming across all times of winter. Why put manure on your fields in the spring? Is that "Oh, there's Maggie with a milk- the way the Lord manures His farm? pail, and I'm so thirsty. I'm going to Is that the way He has reared these No; He raises a plant to feed an ani-This was said by the young lady, and | mal to make fertility, and He always as she spoke she drew up her horse, spreads manure in the fall." We in her companion following suit. Maggie the West are lamentably-even fearcame up to where they were and said a fully-prodigal of the resources of our timid good morning. With her brown soil, and the time is coming as hair straggling down over her young inevitably as night follows day shoulders, her wide, blue eyes, delicate, when we shall pay the penbrown face and neck, and tall, slim alty for this unwarranted theft. figure, she presented a picture of Our Eastern friends are face to face striking beauty as she stood there as- with the problem of the reinvigoration suring the young lady on the horse of their exhausted soils, and so we that she was quite welcome to all the shall be also unless we utilize in the milk she could drink. # Tamping Fence Posts.

It is true that tamping all of the posts is largely labor lost? A correspondent replies in the affirmative, basing the conclusion on results of experience in building many miles of post-and-wire fence, and explains his position and practice as follows;

"A hole is dug in the ground with an upright back to it two and a half feet deep, with a slanting front, the bottom space as nearly the size of the post-butt as it is possible, with a longhandled spade, so the worker may stand upright in his work. The post now being let down is solid in the bottom, the earth filled in to the sur-

"This saves the tamping usually word. In winter here the earth is "But we," said the city person, frozen to the bottom of the post. In "have had new potatoes for the last spring it is thawed again into wet mud. both tamped and loose setting, "Huh!" said the farmer, without a soon to settle down solid by drainage Review.

## A BEAUTIFUL CAVERN.

Strange Discovery of a Farmer Near Findlay, O.

His Horse Breaks Through the Earth and a Subterranean Passage Is Disclosed-A Large Cave That Has Been Only Partially Explored.

About ten miles southeast of Findlay, O., writes a correspondent of the Chicago Tribune, lies a long stretch of limestone, which cropping out at various places serves to mark the dividing line between Hancock and Wyandot counties. At this point the limestone reaches its highest elevation in Northwestern Ohio and then dips rapidly away, not to appear again above the surface until it reaches the shores of Lake Erie on the north, and the Limestone river. near Springfield, on the south.

One mile south of this ridge of limestone is the beginning of what is popularly supposed to have once been a lake, from which the water has in some mysterious way been drained, leaving a sunken space varying in depth from ten to forty feet and ten miles long by three wide, over which the rank vegetation of perhaps centuries has grown, died and decayed, leaving a bog or morass A short distance from the marsh, and

still further south, a wonderful cave has recently been discovered, concerning which marvelous reports have been put in circulation by the people living in the neighborhood. The entrance to the mysterious cavern was accidentally discovered by a horse breaking through a thin crust of earth while at work in a field. In rescuing the animal it was found that the hole into which he had partially fallen led down into some dark and unknown space, which gave back no echoing sound when substances were dropped into it. This aroused the curiosity of the farmer, Henry Greindle, who came to this city to relate the story of his wonderful find. A party of men drove out there and investigated the matter sufficiently to satisfy themselves that Greindle had actually discovered something much out of the ordinary in the cave line.

The farmer, finding a flood of people overrunning his premises looking for the entrance to the cavern, conceived the idea of turning his discovery into profit, and, manufacturing a rope ladder, he erected a tent over the yawning hole in the ground, and charged venturesome visitors ten cents each for the privilege of going down to the bottom of the cave.

The correspondent visited the cave and made as thorough an examination as it was possible. The distance from the top to the first landing is about sixty-five feet, and the passage is through solid limestone all the way, the aperture varying in diameter from three to thirty feet. The floor of the first resting-place is dry rock of an uneven character. This landing is an ante-chamber about sixty-five feet wide at the back. The wall is a solid rock clear up to the surface of the earth and about one hundred feet in length, when it forms the doorway or entrance to the main cavern. The main chamber has a dome-like roof of rock which rises gradually from all sides to an apex not less than fifty feet in height. The dimensions of this room, as near as could be measured, are 180 feet by 436. The floors are full of little hills and valleys, making walking in the semi-darkness-the only light furnished visitors being lanterns-exceed ingly difficult and falls frequent. The roof of this part of the cave is dark, rocky and unbroken by any thing of a glittering char-

At the point where the chamber narrows there is a dark, deep fissure in the floor, be vond which human vision can not penetrate This chasm, which is about twenty feet wide, has been bridged, and as one passe over he can hear the rippling of water be neath him. On the other side of this stream or river is a long irregular gallery which leads into another chamber, but not so large as the first. Here the roof and sides reveal stalactites in abundance, al resplendent in brilliant colors. Nothing indicating animal or vegetable life was found here or in any of the other apartments of the cave. Beyond this room is a lake of water, which in shape and contour of shore is a fac-simile, in miniature, of the sunken lake above. This body of water has been measured, and in many places is eighty feet deep. The water is clear, cold and placid. Not a ripple mars its surface. It lies there still, icy and dead, while above it is the stalactite-studded roof, and in and about it eternal silence. A small canoe is there to carry those who desire to venture the trip along the ragged shores for at least a quarter of a mile, where further progress is stopped by a solid wall of rock. This is the end of the cave. At least, no other open-

ing or chamber has yet been discovered. Numerous geologists have already written for full and minute particulars regarding its rock and crystal formations and a number have signified their intention of paying it an early visit, in which event it is likely that much of an entertaining and instructive character will be brought out. The country surrounding this cave, while having a limestone foundation, is comparatively level, and has none of the character istics peculiar to the cave countr of other

Venom Inhaled with the Air, And imbibed with the water of a malarious locality, has still a certain antidote. Dealer in General Merchan

ICELAND geographically belongs to Amer-ica, but is considered by some as belonging to Europe because of its early discovery—in the ninth century A. D.

MISFORTUNE in nine times out of ten is simply another name for laziness, or bad management, and it really isn't any thing to your credit to be croaking all the time bout misfortune. If you have no employment, or are being poorly paid for the work you are doing, then write to B. F. Johnson & Co., of Richmond, Va., and they will show you how to transform Miss-fortune into Madame-fortune. Try it.

A New York man has invented an elec trical switch, and somebody suggests that it is about time for the small boy to begin to
